

## **Shelf Life On White & Yellow Glue?**

*A tip by Dave Thomson as published in the March/April 2003 issue of Central Indiana Aeromodellers Newsletter  
"CIA Informer"*

White and yellow glues have a 2 year shelf life!

Franklin (Titebond) date code is as follows:

2Gxxxx (2=last digit of year made; G=7th letter of alphabet=7th month of the year=July.

How 'bout that!

Elmer's date code is as follows: H23A

(H=year (2002), (=2003); 23= day of the month; A=month (where A=Jan, B=Feb, etc....))
